

Name _____

Plants

Locate and read books about plants. Consider plants without seeds and plants with seeds - algae, fungi, lichens, mosses, ferns, conifers, trees, shrubs, herbs, vines, grasses, and flowering plants. You may also use an encyclopedia and world atlas. If possible, use the Internet for information.

SYNTHESIS

- Choose a plant and label its parts. Then re-design internal and/or external parts so the plant could adapt or better survive, grow, reproduce, and/or behave (react to its environment).

	Forming 1	Growing 2	Mature 3 4	
Synthesis				
Re-design of a plant	Parts labeled correctly; no different internal or external part in re-design	Parts labeled correctly; 1 new internal or external part in re-design; 1 criteria for improvement	Parts labeled correctly; 2 new internal or external parts in re-design; 2 criteria for each part	Parts labeled correctly; 2 new internal or external parts in re-design; 5 total criteria for improvement; model of the new plant

New Part	External	Internal	Criteria
