

Author Bio

Dr. Carrie Simpson has been in the field of education for 14 years, serving in the classroom and in central administration. In the classroom, she taught secondary English and writing courses, composition and rhetoric at the community college level and currently teaches courses on diverse populations for the University of Texas at Dallas.

Her classroom specializations include gifted learners, differentiated instruction and inclusion models. In her administrative experience, Dr. Simpson has served in special student services as well as gifted student services, and has been a district lead for the implementation of differentiation.

Dr. Simpson presents across the country on the topics of gifted education, differentiation in the AP classroom, differentiation in the general classroom, leadership for DI, instructional rounds, how to reach special populations and brain-based instructional practices.

In her workshop sessions, Dr. Simpson models differentiated instruction approaches and strategies while collaborating with curriculum writers and directors, campus leadership, central administrative leaders, and teachers. Carrie is an energetic presenter who believes in the value of collaboration during professional development sessions. Her unique and broad background in the field of education makes her a versatile presenter and a valuable resource.

Dr. Simpson currently resides in Allen, Texas, with her husband, Eric and her three daughters, Abby, Madeline and Meredith.
