

With an orange pencil, trace on your map the route from Bombay to Tokyo. Estimate the distance in both miles and kilometers and enter the distances on your chart.

Aboard their flight, the pilot announced that they were passing over a statue of Buddha, at 394 feet or 120 meters, the world's tallest statue.

Margaret commented, "The San Jacinto Monument is the tallest monumental column at (16) _____ feet, and the Gateway to the West in St. Louis, Missouri is the tallest monument with a height of (17) (a) _____ feet, making it (b) _____ feet taller than the San Jacinto Monument."

#18. Hint: Convert the Archway's height of feet to meters by multiplying by .91, then that number is in meters for the Archway. Change meters to decimeters. Compare.

"That means the Gateway to the West is (18) _____ decimeters taller than the Great Buddha Statue in Japan," said RaShundra.

(19) *Draw a graph comparing the heights of the Buddha statue, the San Jacinto Monument, and the Gateway to the West.*

"Toyko Disneyland is the most visited theme park in the world," interrupted RaShundra. "Wonder what it would be like?"

Tony exclaimed, "I bet it's awesome! Let's go there!"

"Yes, yes, yes," chimed Margaret and Stevie, "we're on our way."
