

# Your Human Body - 3

## Learning Style

Visual

## Taxonomy Level

Knowledge

## Multiple Intelligence

Visual/Spatial, Logical/Mathematical

## Assessment

1. correctness of information charted
2. well organized
- 3.

## Project Question

What disease would you attempt to cure if you were given everything you needed?

## Questivities™

List the symptoms of the fictional disease *arachnoscoliopinkus*.

Compare/contrast a stethoscope with a microscope.

What would happen if doctors only worked weekends?

If sick, would you rather swallow a pill or get a shot?

How would you feel if all medicine tasted like liver?

Why is it a matter of life or death to save the rain forests?

Imagine you are a cure for cancer. Plan your rescue - where would you attack first, with what, how long, etc.?

## Active Questioning

Make a list of questions a needle might ask an ultrasound machine.
